Correspondent Technology Writer

Summary of what we're looking for?

- Do you like technology?
- Trying scores of apps a month?
- Played almost every game out there?
- Have your own opinion on how AI can improve the world?
- Or want to educate the world on how to keep themselves safe online?

If the answer to any of the above is yes, then you're the one!

We will give you a platform to tell others about your experience from the comfort of your home, (or anywhere else).

Responsibilities

As the Tech Writer, you will write about Tech (no surprises there, huh?)

While you can write about anything you feel but the general expectation would be to cover:

1. Product Launches & Feature Descriptions
2. App Suggestions, comparisons and reviews
3. Latest in Cloud, Blockchain, AI, etc.
4. How-Tos

Skills & Experience

Qualifications and experience don't matter when you're a good storyteller. And we would love to see that latent talent come out in open.

Though, a basic understanding of formatting, working with images, etc. will be handy (but not necessary thanks to the presentation team).

We will be equally excited to have you whether you are a journalist or an intern.
